JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Acid-catalyzed reaction pathway
Pyrolysis mechanisms of lignin: surface-immobilized model compound investigation of acid-catalyzed and free-radical reaction pathways, 1

Acrylic resins
Compositional analysis of multicomponent acrylic resins by pyrolysis–capillary gas chromatography, 181

Alkali salt impurities
Effects of solvents and inorganic salts on the reactive pyrolysis of aromatic polyester in the presence of tetramethylammonium hydroxide studied by pyrolysis–gas chromatography/mass spectrometry, 167

Allophanate
Thermal degradation mechanism of α,γ-diphenyl alkyl allophanate as a model polyurethane by pyrolysis–high-resolution gas chromatography/FT-IR, 269

Aromatic polyester
Effects of solvents and inorganic salts on the reactive pyrolysis of aromatic polyester in the presence of tetramethylammonium hydroxide studied by pyrolysis–gas chromatography/mass spectrometry, 167

Aromatic polyimides
Linear-temperature programmed pyrolysis of thermoresistant polymers — mass and FT-IR spectrometries. Part 3. Poly(1,4-phenylene terephthalamide) and aromatic polyimides, 195

Automobile industry
In-product environmental protection: evaluation of chemical emissions from the spot welding joining technique in the automobile industry. Part II. Laboratory pyrolysis measurements with a welding chamber, 91

Binder
Thermogravimetry/mass spectrometry analysis of the process for removing binder polymer from ceramics obtained by injection molding, 139

Brominated polystyrene
Thermal behavior and degradation mechanism of brominated polystyrenes, 213

Brown-rot fungus
Pyrolysis–gas chromatography/mass spectrometry of milled wood lignin of two Chilean woods naturally decayed by *Ganoderma australe*, *Phlebia chrysocrea* and a brown-rot fungus, 61

Canonical correlation analysis
Linking of pyrolysis–chemical ionisation mass spectrometric and monomer compositional data of *O*-(2-hydroxyethyl) celluloses by canonical correlation analysis, 21

Capillary column
Characterization of stereoregular polystyrenes by pyrolysis–gas chromatography, 121
Compositional analysis of multicomponent acrylic resins by pyrolysis–capillary gas chromatography, 181

Carbodiimide
Thermal degradation mechanism of α,γ-diphenyl alkyl allophanate as a model polyurethane by pyrolysis–high-resolution gas chromatography/FT-IR, 269

Ceramics
Thermogravimetry/mass spectrometry analysis of the process for removing binder polymer from ceramics obtained by injection molding, 139

Chemical emissions
In-product environmental protection: evaluation of chemical emissions from the spot welding joining technique in the automobile industry. Part II. Laboratory pyrolysis measurements with a welding chamber, 91

0165-2370/95/$09.50 © 1995 – Elsevier Science B.V. All rights reserved

Combustion
Fast thermolysis/FT-IR studies of fire-retardant melamine–cyanurate and melamine–cyanurate containing polymer
Compositional analysis
Compositional analysis of multicomponent acrylic resins by pyrolysis–capillary gas chromatography, 181
Compositional and sequential analysis of poly(ethylene–tetrafluoroethylene) by pyrolysis–gas chromatography, 103
Curie-point
Classification of Japanese softwood species by pyrolysis–gas chromatography, 51
Cyclization
Thermal degradation of polybenzimidazopyrrolones, 231

Decolorization
Paper waste-water analyses by pyrolysis–gas chromatography/mass spectrometry during biological decolorization with the fungi *Coriolopsis gallica* and *Paecilomyces variotii*, 39
Degradation
Thermogravimetry/mass spectrometry analysis of the process for removing binder polymer from ceramics obtained by injection molding, 139
Degradation mechanism
Thermal behavior and degradation mechanism of brominated polystyrenes, 213
Dehydrochlorination
Thermal degradation studies of poly(vinyl chloride) and ethylene–vinyl chloride copolymer, 243
Diastereoisomer
Characterization of stereoregular polystyrenes by pyrolysis–gas chromatography, 121
Dichyandiamide
Characterization of epoxy resins cured with dicyandiamide in the presence of imidazole catalysts by high-resolution pyrolysis–gas chromatography, 157
2,4-Diphenylpentane
Gas chromatography of styrene oligomers using a Curie-point pyrolyzer, 149

Environmental protection
In-product environmental protection: evaluation of chemical emissions from resin fortified resistance spot welding in the automobile industry. Part I. Thermal analysis/mass spectrometry and laboratory pyrolysis measurements with the German VCI oven, 77
In-product environmental protection: evaluation of chemical emissions from the spot welding joining technique in the automobile industry. Part II. Laboratory pyrolysis measurements with a welding chamber, 91
Epoxy resin
Characterization of epoxy resins cured with dicyandiamide in the presence of imidazole catalysts by high-resolution pyrolysis–gas chromatography, 157
Ethylene–vinyl chloride copolymer
Thermal degradation studies of poly(vinyl chloride) and ethylene–vinyl chloride copolymer, 243

Fire-retardant
Fast thermolysis/FT-IR studies of fire-retardant melamine–cyanurate and melamine–cyanurate containing polymer, 253
para-Formaldehyde
Direct and rapid characterization of *para*-formaldehydes by pyrolysis–gas chromatography/chemical ionization mass spectrometry, 111
Free-radical reaction pathway
Pyrolysis mechanisms of lignin: surface-immobilized model compound investigation of acid-catalyzed and free-radical reaction pathways, 1
FT-IR
Fast thermolysis/FT-IR studies of fire-retardant melamine–cyanurate and melamine–cyanurate containing polymer, 253
Linear-temperature programmed pyrolysis of thermoresistant polymers — mass and FT-IR spectrometries. Part 3. Poly(1,4-phenylene terephthalamide) and aromatic polyimides, 195

Gas chromatography
Compositional and sequential analysis of poly(ethylene–tetrafluoroethylene) by pyrolysis–gas chromatography, 103
Direct and rapid characterization of *para*-formaldehydes by pyrolysis–gas chromatography/chemical ionization mass spectrometry, 111
GC/FT-IR
Thermal degradation mechanism of α,γ-diphenyl alkyl allophanate as a model polyurethane by pyrolysis–high-resolution gas chromatography/FT-IR, 269

High-resolution pyrolysis–gas chromatography
Characterization of epoxy resins cured with dicyandiamide in the presence of imidazole catalysts by high-resolution pyrolysis–gas chromatography, 157
Hydroxyethyl cellulose
Linking of pyrolysis–chemical ionisation mass spectrometric and monomer compositional data of *O*-(2-hydroxyethyl) celluloses by canonical correlation analysis, 21

Imidazole
Characterization of epoxy resins cured with dicyandiamide in the presence of imidazole catalysts by high-resolution pyrolysis–gas chromatography, 157

Japanese softwood
Classification of Japanese softwood species by pyrolysis–gas chromatography, 51

Lignin
Classification of Japanese softwood species by pyrolysis–gas chromatography, 51
Paper waste-water analyses by pyrolysis–gas chromatography/mass spectrometry during biological decolorization with the fungi *Coriolopsis gallica* and *Paecilomyces variotii*, 39
Pyrolysis mechanisms of lignin: surface-immobilized model compound investigation of acid-catalyzed and free-radical reaction pathways, 1
LLDPE
Thermogravimetry/mass spectrometry analysis of the process for removing binder polymer from ceramics obtained by injection molding, 139

Mass spectrometry
Direct and rapid characterization of *para*-formaldehydes by pyrolysis–gas chromatography/chemical ionization mass spectrometry, 111
Linear-temperature programmed pyrolysis of thermoresistant polymers — mass and FT-IR spectrometries. Part 3. Poly(1,4-phenylene terephthalamide) and aromatic polyimides, 195
Linking of pyrolysis–chemical ionisation mass spectrometric and monomer compositional data of *O*-(2-hydroxyethyl) celluloses by canonical correlation analysis, 21
Thermal behavior and degradation mechanism of brominated polystyrenes, 213
Thermal degradation of polybenzimidazopyrrolones, 231
Methanolysis
Effects of solvents and inorganic salts on the reactive pyrolysis of aromatic polyester in the presence of tetramethylammonium hydroxide studied by pyrolysis–gas chromatography/mass spectrometry, 167
Milled wood lignin
Pyrolysis–gas chromatography/mass spectrometry of milled wood lignin of two Chilean woods naturally decayed by *Ganoderma australe*, *Phlebia chrysocrea* and a brown-rot fungus, 61

Nitrogen phsophorus detector
Characterization of epoxy resins cured with dicyandiamide in the presence of imidazole catalysts by high-resolution pyrolysis–gas chromatography, 157

Paper industry effluents
Paper waste-water analyses by pyrolysis–gas chromatography/mass spectrometry during biological decolorization with the fungi *Coriolopsis gallica* and *Paecilomyces variotii*, 39
PBMA
Thermogravimetry/mass spectrometry analysis of the process for removing binder polymer from ceramics obtained by injection molding, 139
Polybenzimidazopyrrolones
Thermal degradation of polybenzimidazopyrrolones, 231
Poly(*p*-bromostyrene)
Thermal behavior and degradation mechanism of brominated polystyrenes, 213
Polyene
Thermal degradation studies of poly(vinyl chloride) and ethylene–vinyl chloride copolymer, 243
Poly(ethylene–tetrafluoroethylene)
Compositional and sequential analysis of poly(ethylene–tetrafluoroethylene) by pyrolysis–gas chromatography, 103
Polymer
Fast thermolysis/FT-IR studies of fire-retardant melamine–cyanurate and melamine–cyanurate containing polymer, 253
Poly(1,4-phenylene terephthalamide)
Linear-temperature programmed pyrolysis of thermoresistant polymers — mass and FT-IR spectrometries. Part 3. Poly(1,4-phenylene terephthalamide) and aromatic polyimides, 195

Polystyrene
Characterization of stereoregular polystyrenes by pyrolysis–gas chromatography, 121
Polyurethane
Thermal degradation mechanism of α,γ-diphenyl alkyl allophanate as a model polyurethane by pyrolysis–high-resolution gas chromatography/FT-IR, 269
Poly(vinyl chloride)
Thermal degradation studies of poly(vinyl chloride) and ethylene–vinyl chloride copolymer, 243
Preparative scale liquid chromatography
Gas chromatography of styrene oligomers using a Curie-point pyrolyzer, 149
Py-HRGC/FT-IR
Thermal degradation mechanism of α,γ-diphenyl alkyl allophanate as a model polyurethane by pyrolysis–high-resolution gas chromatography/FT-IR, 269
Pyrolysis–gas chromatography
Thermal degradation of polybenzimidazopyrrolones, 231
Compositional analysis of multicomponent acrylic resins by pyrolysis–capillary gas chromatography, 181
Pyrolysis–gas chromatography/mass spectrometry
Characterization of stereoregular polystyrenes by pyrolysis–gas chromatography, 121
Effects of solvents and inorganic salts on the reactive pyrolysis of aromatic polyester in the presence of tetramethylammonium hydroxide studied by pyrolysis–gas chromatography/mass spectrometry, 167
Gas chromatography of styrene oligomers using a Curie-point pyrolyzer, 149
Paper waste-water analyses by pyrolysis–gas chromatography/mass spectrometry during biological decolorization with the fungi *Coriolopsis gallica* and *Paecilomyces variotii*, 39
Pyrolysis–gas chromatography/mass spectrometry of milled wood lignin of two Chilean woods naturally decayed by *Ganoderma australe*, *Phlebia chrysocrea* and a brown-rot fungus, 61

Reactive pyrolysis
Effects of solvents and inorganic salts on the reactive pyrolysis of aromatic polyester in the presence of tetramethylammonium hydroxide studied by pyrolysis–gas chromatography/mass spectrometry, 167

Sequential analysis
Compositional and sequential analysis of poly(ethylene–tetrafluoroethylene) by pyrolysis–gas chromatography, 103
Step-ladder polymer
Thermal degradation of polybenzimidazopyrrolones, 231
Stereoregularity
Characterization of stereoregular polystyrenes by pyrolysis–gas chromatography, 121
Styrene oligomers
Gas chromatography of styrene oligomers using a Curie-point pyrolyzer, 149
Surface-immobilized model compound
Pyrolysis mechanisms of lignin: surface-immobilized model compound investigation of acid-catalyzed and free-radical reaction pathways, 1

Tertiary chlorine
Thermal degradation studies of poly(vinyl chloride) and ethylene–vinyl chloride copolymer, 243
Tetramethylammonium hydroxide
Effects of solvents and inorganic salts on the reactive pyrolysis of aromatic polyester in the presence of tetramethylammonium hydroxide studied by pyrolysis–gas chromatography/mass spectrometry, 167
TG/MS
Thermogravimetry/mass spectrometry analysis of the process for removing binder polymer from ceramics obtained by injection molding, 139
Thermal analysis/mass spectrometry
In-product environmental protection: evaluation of chemical emissions from resin fortified resistance spot welding in the automobile industry. Part I. Thermal analysis/mass spectrometry and laboratory pyrolysis measurements with the German VCI oven, 77
Thermal degradation
Thermal degradation of polybenzimidazopyrrolones, 231
Thermal degradation studies of poly(vinyl chloride) and ethylene–vinyl chloride copolymer, 243
Thermolysis
Fast thermolysis/FT-IR studies of fire-retardant melamine–cyanurate and melamine–cyanurate containing polymer, 253

Trimethylsilyl derivative
Direct and rapid characterization of *para*-formaldehydes by pyrolysis–gas chromatography/chemical ionization mass spectrometry, 111

Urethane
Thermal degradation mechanism of α,γ-diphenyl alkyl allophanate as a model polyurethane by pyrolysis–high-resolution gas chromatography/FT-IR, 269

Welding
In-product environmental protection: evaluation of chemical emissions from the spot welding joining technique in the automobile industry. Part II. Laboratory pyrolysis measurements with a welding chamber, 91
